Fly Fishing for Great Lakes Steelhead - A complete discussion of the pursuit of steelhead in the Great Lakes region. The program looked at run timing, steelhead behavior, strategy, techniques, flies and some of the region's top rivers.

Monthly fly tyers.

Thanks to the fly tying volunteers for April (Bud Knopff, Scott Vogin and Jack Walsh) and May (Mike Dekleva and George Kawchak). Bud did a black gnat with a crow body and starling hackle. Scott tied a baggy nymph pattern of Fishy Fullum's with a zip-lock bag body and emu feather (or hackle) legs. Jack demonstrated the original Frank Sawyer style of tying a pheasant

tail nymph using just pheasant tail and wire and also a black quill wet fly. Mike tied his own creation of various hymenoptera species. The hornets and wasps had dubbed bodies, thin skin backs and realistic goose biot stingers. George showed us how to tie various simple wet flies (several early season ones and a sulfur) that have worked for him for 45 years.

Hi, Neil Amershek here , I work for a lure company here in PA. We are growing very fast! We've received an order for a lot of lures all hand tied. These are primarily bass lures but all tied with traditional fly stuff. We are looking for a team to help us tie these, we DO NOT want to have to go overseas to get this done, you will be supplied with all supplies you will need and paid by the piece. We want to keep this made in PA and the U.S.A. I'm being very brief in this email just to see if you are interested . If you are or if you have any questions, please feel free to contact me.

Thanks for your time,

Neil Amershek
