

## Main Line Fly-Tyers 2005-2006

Welcome to another year with Main Line Fly Tyers. We will be keeping some things the same while trying to introduce some new ideas. If anyone has any suggestions please send them in or bring them up at the meetings.

Anyone that has items of interest that they would like to trade, buy or sell, we can list them in this newsletter each and every month in the "Traders Corner". Please try to email them to me at [randy@mainlineflytyers.net](mailto:randy@mainlineflytyers.net) as soon as possible so I can get them in the next newsletter. If anyone is planning any trips and they are looking for interest from others we can list them as well.

Watch this newsletter for upcoming events such as trips, presentations and other happenings.

Sam will teach you how to find fish, approach them and catch them! If your lucky, he may even give up some of his secrets that have made him successful for over 20 years! You to can become a better fisherman and stop coming up empty handed!

## Upcoming Events

### Monster Trout Trip

October 14th and 15th

Catch Monster Trout in New York State! Since this is a Sam Vigorita trip, the location is a secret that will be revealed to only those that commit to the adventure, what a salesman! Accommodations in the area are questionable at this time so the dates for this trip are tentative and are subject to cancellation. Stay tuned for more information on this trip.

### Super Steelhead Trip

November 12th and 13th

Fish for Steelhead in the Pulaski region of New York. Sam Vigorita will be showing you a few of his secret spots! Stay tuned for more details.

Dates and trip details are subject to change.

## September Meeting

## Guest Speaker : Ozzie Ozefovich

Once again Ozzie Ozefovich will make an appearance at our monthly meeting. This presentation will be “Trout Vision and Refraction” This is a small portion of what can be found on Ozzies website and what you will see here during his presentation.

“Every angler knows the frustration of lining a fish. After finding that big fish actively feeding, we make a cast where we think it should be, and—quick as a flash—it’s gone! What you forgot about was the law of refraction. That fish wasn’t quite where you thought it would be. You thought it was six inches below the surface. But how deep was it, one foot, two feet, or was it deeper? How large was its “circle of vision” and does it matter?”

In this third installment of *The Underwater World of Trout*, we explore why what you see isn't what the trout sees. More importantly, you'll learn to interpret what you actually see to better understand what is really happening under the water.”

Ozzie Ozefovich

You can check out Ozzies website at [www.underwateroz.com](http://www.underwateroz.com). Ozzies first DVD, *Discovery*, will be available for sale at the meeting for the price of \$20.00. This is \$4.95 off the regular price of \$24.95.

Be sure not to miss this interesting and informative presentation.
